

6. Spiritual Medicine - II

Leonardo da Vinci: Study of embryo

Preamble

The Spiritualist Society of Athens “The Divine Light” published two books that primarily contain teaching by Hippocrates [20] and [21]. I have translated excerpts from these two books and have added some teachings by Homer from [10]. All the teachings relate to medicine and the medical profession. Because of the large number of topics I have divided them into three monographs (Monographs 5, 6 and 7) that group together selected medical areas. The Greek texts are given in chronological order, whereas the monographs are groupings of topics. In the monographs, I have provided the reference as well as the day/date that the Teaching was delivered

Hippocrates, the greatest of all earthly physicians is the head of a spiritual group of doctors that the Lord Jesus Christ has created.

It has to be stressed that the early scientists wrongly coined the term psychiatry and psychiatric illness. A clarification of this mistranslation is given in the monographs and the importance of looking after our bodies is explained.

From 1970 until the completion of the Teachings, the Spiritual Society of Athens ran a “therapeutic branch” where many sufferers attended and sought advice regarding their illnesses. Some of the dialogues between patients and Spiritual Teachers are given in the Greek texts, but I have omitted them.

The Spiritualist Society of Athens “The Divine Light” is currently translating into English the two above-mentioned volumes. Further information is available from their website www.divinelight.org.gr.

This series of monographs complements the four books in the series “The Purpose of Earthly Life” which can be downloaded free from the website www.divinepharos.org.

The meaning of the word “phylismos”

PHARAH: Brothers, We previously have interpreted the meaning of the word “phylismos” using **sexualism** to draw your attention to the meaning of the word. But you were not interested to ask if the word “phylismos” has a deeper meaning and therefore We did not elaborate.

Phylismos means the mutual attraction of **heterosexual** entities from the point of view of their need for spiritual and psychic cooperation, irrespective if this will end into **coition**. After the act of coition between heterosexuals, irrespective if one desired and wished the other, a vacuum is created which their spiritual and psychic union refills, creating between them an intimate and continuous bond.

Phylismos satisfies both the heterosexuals from all points of view and protects them from neurosis, incomprehensibility and anguish. Phylismos is a bond that is not only concerned with the material need of the two sexes but also their psychospiritualism. The substance of the word lies in the more complete union of their attributes for the balancing of the soul and the spirit. One complements the shortcomings of the other in total cooperation and complete harmony.

Phylismos: is the means that satisfies the psycho-spiritual entity as well as its body.

Sexualism: is the momentary bodily gratification that after its energy (is expended) it creates a vacuum and languor in the entity. That is why it also creates a spiritual decline from which harmful consequences stem.

Phylismos

HIPPOCRATES: **Sexology** does not belong to the ethical part of the Word, because ethics is a branch of philosophy.

Phylismos incorporates two factors: the spirit itself and the material gratification.

Phylismos is the contributing factor of a good or bad life. From it stems the occult sufferings of the human race. Therefore, it belongs to a special branch of the Word and energy, and is classified under the animal strength of the entity.

Men have not as yet managed to classify phylismos to a specific branch of science.

Phylismos is the ground on which two opposite worlds operate: the Heavenly and the earthly. And because the action produces carnal pleasure, the earthly world prevails, from which stems the ills of mankind.

Medical science will classify it in a special chapter, not with human

[20:261-262]
{24 Nov 1972}

sexualism: *involving reproductive union.*

heterosexual: *(from the Greek: hetero = opposite) refers to sexual behaviour practices or identity predicated on exclusive preference for the opposite sex. [NB. Greek: homo = same].*

coition: *sexual intercourse.*

psychospiritualism: *the spiritual needs of a entity consisting of a soul and a spirit.*

sexualism: *This term is used in the literature to refer to Man's sexual nature.*

[20:39-40; 40-42]
{4 and 25 Dec 1965}

Sexology: *is the study of human sexual interests, behaviour and function.*

knowledge but with Heavenly. That is, the scientist ought to collaborate with the Spiritual World, because only from It will he receive directions and Light, so that evil can be destroyed and humanity saved.

Every human is a different world. Of course, there are similarities and resemblances but these are not absolute. This chapter is the most difficult of all and needs spiritual study with Our help.

Phylismos has as its base the measure. But this measure is elastic and needs to be adjusted by Our Authority since you ignore its dark side.

Phylismos emphasises heredity and a spiritual strength or its collapse.

Many men have the opinion that phylismos is natural to Man. But they do not know its consequences when they exceed the rule that Our Authority specifies: All earthly entities, have the right to consult the Spiritual World about the state of their phylismos, because by not knowing the consequences of not upholding the Rule it is possible to fall into a heavy social sin.

For the faithful, there are many methods of communication. Only one method of communication with Our Authority exists, which you benefit from. **When this one ceases, automatically the communication of Divine with Earth will terminate until the end of your world.**

HIPPOCRATES: All men are unable to lift the same **weight**; similarly, all the faithful do not have the same strength to lift the same weight of the Cross. Whoever is destined to lift a specified weight and lifts above the measure, causes harm to his entity, which is always incurable. Many who know in advance of the harm that lifting above the measure can cause, avoid this trouble.

The same does not happen with phylismos as with weight. Man in this situation, thinks instinctively and never refutes this weight, irrespective of how heavy it is. That is, his spirit does not balance the measure with his idiosyncrasy. This desire that always flourishes in Man is called "elastic measure". Exceeding the measure at the expense of phylismos, we sin against correctness and thus fall in the counterbalance of self-punishment.

In other words, in phylismos there are: the measure and the excess of the measure.

For the two genders, there is: first, the ready food and secondly the unprepared food.

Ready food is the bond of two heterosexuals in common consent; they give a solution to phylismos for mutual satisfaction.

When this one ceases ... world: refers to the Divine link established by the Lord between Heaven and the Spiritualist Society of Athens. Communications ceased with the death of the medium, Pizanis, in 1979.

weight: weight on the soul of a psycho-spiritual entity is caused by sins and disobedience.

The unprepared food is when one of the heterosexuals exerts opposing willpower on the other, that is, one of them, by fraud, persuasion or pressure forces their will at the expense of the other. This situation in terms of injustice or in terms of compulsion has the weight of ethical pain. That is, the enforcer, sins not for the act of coition but for material satisfaction without a virtuous reason.

If the bond of phylismos is left free, as it exists in beasts, then Man instead of ascending as a spiritual entity will fall to a lower level than that of animals.

As you know, the spirit is a gift from God to Man. Therefore, when Man does not use this gift appropriately, then pressure is exerted on his spirit, so its light is removed and it walks in darkness.

In Heaven when the spirit of an entity is overcome by soul strength, then it returns to Earth, to confirm that the spirit has truly changed tactics. Divinity knows the entity but It leaves Man alone to recognize himself and accept his mistakes without anyone's intervention.

Eros, nature's trap

PHARAH: **Eros** has a general meaning; it is distinguished from Love, and it means the acquisition of sensation.

Its definition is: Eros means passion, which is created by the attraction of your physical need for the satisfaction of your senses.

They say, "eros is blind", because it confuses the mind that does not perceive where it is heading. I say heading, because it is the mind that directs you.

It is not a disease as others say, but attraction and confusion. The strength of eros depends on the confusion of the mind and the physical need to fulfil a vacuum.

Eros is only a physical material force. For this reason eros needs to be educated, so that it does not exceed the measure, because when the confusion is cleared and the passion is satisfied, repulsion is as strong as the over-the-measure attraction.

Eros is nature's trap. You are captured and you do not know for a while in what situation you will find yourself.

Refuse the cup with the glittering unknown sweet drink of eros. It will possibly make you drunk until despair.

HIPPOCRATES: Eros as We understand it from the material point of view, is the natural drive of entities to multiply. If the latter was the only reason, then humans would not procreate. For this reason nature's foresight gave carnal pleasure to erotic contact. But you know from the Spiritual World that Man can move freely within the measure. Exceeding the measure always tends towards that considered to be undesirable by Heaven.

NB:

It is generally assumed that modern sexual medicine was founded by German psychiatrists and dermatologists for example, Richard von Krafft-Ebing and Iwan Bloch. History of modern sexual medicine began, indeed, decades earlier so that nowadays scientists look back over 150 years-not 100 years-of research, praxis, and teaching. The Italian professor of pathology and anthropology, Paolo Mantegazza (1831-1910) was a pioneer in this area (See Monograph 7: Spiritual Medicine - III).

[20:17-18] and [20:212-215]

{27 Nov 1962} and {13 Dec 1971}

Eros: sexual love

My dear brethren, since you are on Earth and you are material men, you, of course, have a need of all material means from all points of view. But this does not mean that uncontrolled you are able to exceed everything. So that, you will not find yourself from the shore (side) of the Good to the opposite side, the shore of the harmful.

Friendship between humans, that is, between men and women is not abhorrent to Heaven. Heaven has not set the barriers. But because Man loses control of all that he likes, the (earthly) wise men invented barriers to such an extent, that today they produce the opposite result as a reaction to these excessive barriers and they increase corruption in your world.

Eros as is developed in My talk, is “**pathos**”. This brings the absurdity that when nature forces, the spirit obeys without agreement, logic and real love. For this reason I spoke for a while about eros because this affliction falls within My area.

Bond between man and woman

HIPPOCRATES: For completion, I give you an aspect of **erotism** between two heterosexuals. I divide it into four categories:

- A - Bond by religious marriage, due to empathy or self-interest.
- B - Bond by political marriage, by intention, but with incalculable and uncertain results.
- C - Bond based on close friendship until satiation, with the consequence of only the habitual body contact, so that the two heterosexuals extinguish their **pathos** but its renewal with other persons and the complete removal of specific aim and total indifference to the measure.
- D - Sacred bond of two heterosexuals, under any form, which is possible for this bond to rarely appear in the above categories, excluding a third person. This bond, that is called sacred, can be found in the mutual attraction of the two interested heterosexuals with the formation of the sacred measure of their love. This bond is the most sacred and complete, whenever it appears – albeit rarely.

The analysis of the above four categories:

A- This first religious bond, is necessary in society because its basis is the ethical principle and the sentiment of the two interested parties that crystallises the sanctity of love and places eros in secondary position by purifying it.

This phenomenon is rare during the cohabitation of the couple because this bond from the beginning had considered a number of options and overt self-interests or even hidden ones.

B- The second, the political marriage or bond, is a contract between two heterosexuals, rarely perfect and usually not. Because when the characters of the heterosexuals do not match, they easily dissolve

***pathos:** passion, disease, suffering.*

[20:13-15]

{12 Oct 1962}

***erotism:** sexual hunger, erotic desire, passion.*

***pathos:** the quality or power in an actual human life experience – passion.*

their bond as if nothing had happened.

This bond is an example of the frivolous human nature. Whereas it contains correct views, the majority of them are wrong, because those concerned ignore because of their passion to connect erotically.

Such bond in insignificant cases links two heterosexuals with mutual feeling and sentimentality, so they could become good companions on their earthly life.

C- The third close bond of friendship lasts until its satiation. And because habit becomes second nature, the bond of friendship is nullified and is replaced by another or others, renewing only the desire of passion by totally disregarding the measure.

In this case, the lovers wander in sin, lies, deceit and in their frenzy ignore the existence of the meaning of ideal, where there exists the purified eroticism.

Such men, in time, are considered the scum of society. And the women corrupt their ethos and despair, because younger women, friends of the same category, replace them.

D- The fourth sacred bond is not common; it is rare, because it is not only the bond of empathy of the two heterosexuals, but also their reward of the sacred bond according to the will of Our Authority, for reasons that remain secret. In this case third persons are excluded.

This sacred bond is determined by Heaven and acquires mutual love and erotic elevation through the enlightenment of the Divine measure.

This bond is the most sacred and complete. It creates its own station for the idealism of eros as divine love in the Creation. It is possible to manifest in the most worthy moral category, to awaken and produce.

Heredity

PHARAH: Heredity is the material imprint on the genealogy of Man. The physical habits and propensities of a man can be inherited, because the cells transfer all these other than the spiritual strength to the newborn.

If one is spiritual, he owes this to his psycho-spiritual entity. The soul that is about to attach itself to his family, is a sister soul and has its own consistency. But arriving into your world, it inherits from the material surroundings tendencies that are either good or bad.

If the soul is spiritually superior to its (earthly) **creator**, then its spirit is compelled to cultivate the tendencies, and in the future acquires the talent of Good for whatever follows, or the talent of Evil; then one may say: “ How come this good man acquired a child with such a bad disposition?”

[20:19-20]
{10 Aug 1963}

creator: mother and/or father.

In the material world it is the spirit which rules and decides the life-course of the human entity. If the spirit does not act correctly, the soul attempts to change the spirit's direction and

But if the opposite happens, then it is said: “The father was great and the son having followed his path exceeded his father”.

You are wrong in both cases, because there is no relationship between the newly arrived souls and their parents.

Heredity is an indication of cellular homogeneity, although not absolutely, because the surroundings contribute.

Definition: “Heredity is the conveyed cell into a new entity”.

Parthenogenesis

PHARAH: If you question specialist doctors, each one of them will give an answer based on his comprehension. There are few doctors who know well the meaning of this word.

Parthenogenesis is when a woman gives birth without coming into a union with a man. That is, she is still a virgin. At earlier times, this was considered a phenomenon. However it was wrongly thought as such, because it is against nature; but it can be a natural consequence of the modification of the act that will be explained by Hippocrates.

HIPPOCRATES: Even though some of the earthly doctors have examined this subject, relatively little has been said or published. Therefore, many people consider the birth given by a virgin girl to be an unexplained phenomenon.

But when one delves deeper into the physical Laws and researches them, one will perceive that no one can violate the natural Law and show that a “virgin-mother” is an unexplained phenomenon or even to explain it according to ones subjective perception.

It is time for men to stop creating unnatural situations to cover reality with plausible myths.

An inquisitive person may ask:

“How is it possible for some women in your world, who have never come into physical contact with men and kept their virginity intact, to give birth to children?”

In this situation, the “phenomenon” was not discussed, because it was not in the best interest of the virgin-mothers that they be exposed and this way the truth remained in the darkness, unexplained.

The physical joint act of two heterosexuals despite the barriers of social customs is naturally a condition subject to the Law of “**increase and multiply**”. Therefore, if a woman as a wife, friend or lover comes into contact with the opposite gender, and after her physical contact does not wash and inconsiderately comes into

guides it without forcing it or interfering. When the spirit chooses to act incorrectly it applies pressure on the soul that then is restrained due to its lack of soul-strength. Therefore building up soul-strength on Earth is of paramount importance to overcome the spirit.

*[21:98-101] and [20:44]
{14 Jun 1966} and {31 Oct 1974} and {6 Nov 1974}*

parthenogenesis = virgin birth.

parthenogenesis: is a form of asexual reproduction. In parthenogenesis (“virgin birth”), the females produce eggs, but these develop into young without ever being fertilized. Parthenogenesis occurs in some fish, several kinds of insects, and a few species of frogs and lizards.

increase and multiply: Gen 1:28.

physical contact with a friend who is a virgin, by distorted, calculated intention, or accidental contact is made with her intimate virgin-friend from exceptional love towards her or even ignorance, the remaining spermatozoa in the vagina could possibly transfer into the virgin - and sometimes at depth - and develop quickly, without them perceiving it. The latter then falls pregnant. This way a virgin is fertilised by a woman who transferred the spermatozoa to her.

This is a case of negligence. There are many **others** that I consider superfluous to expand upon.

Therefore, parthenogenesis is not a phenomenon but a careless act of a woman that acted together with a man and indirectly transferred his sperm into another woman or virgin.

Today, woman has been so derailed that she is not concerned about the pretexts of ethics and tradition. That is why modern women many times deny their own children.

I mention all this, to prove that Nature has Laws and rules that are not overturned by myths that Man, due to ethical principles has avoided revealing. But at the same time he has secretly cultivated the debauched life, while feigning an ethical and devout approach.

PHARAH: As you already know, the Laws of the Lord are irrevocable. Based on these, it is not possible for a child to be born without contact between a male and a female.

In rare circumstances when the female does not come into contact with a male and gives birth, then this rare occurrence is called parthenogenesis. It is called so, because the female has not had **coition** with a male.

You will ask: how is it possible to give birth since the Law of the Lord applies to all?

When a spermatozoon enters the female vagina and takes position in the womb, the mother, according to the physical law, feeds it. Before conception manifests, in a new contact with a male, a new spermatozoon enters not only into the womb but it also attaches itself to the first spermatozoon that is already taking shape. The second one does not develop symmetrically with the first one since that has priority.

If the second one, is not of the same gender as the first, a limited preservation is afforded, until the newborn is developed. And if the latter is female, at the age of her first genital orgasm, the primitive spermatozoon enters into the new womb and fertilises the virgin girl!

A few wise priests of the Indian religions knew this.

Parthenogenesis exists in certain **insects**. There are insects that are fertilised by the pollen of certain trees.

***others:** the majority of cases involve a third party and are kept secret to protect the three parties and respect towards prevailing customs*

***coition:** same as sexual intercourse, copulation.*

***insects:** Annual Review of Entomology; Vol 7 pp 349-366; 1962.*

This is how virgin birth is explained.

Spermatozoa subject to radiation of corresponding Heavenly spirits

HIPPOCRATES: When the Spiritual World decides to interpret for you topics that are relevant to both Heaven and Earth, you ought to publicize them as scientific knowledge and not hide them from the wider public due to your hypocritical modesty.

The Heavenly Texts are for all. Those who understand them will benefit from them. Those who do not understand them are spiritually lagging behind. And those who consider them reprehensible, this is due to their excessive hypocrisy.

Do not confuse ethical with physical education. Before you answer, think carefully, weigh your words with calmness and sincerity.

As you know from Our previous texts, the influence of Heavenly Entities on earthly ones is great. Therefore, there is a continuous relationship between Heaven and Earth, for either good or bad, without of course the earthly entities perceiving this energy. That is why I will mention something similar to the direct relationship of Heavenly and earthly entities.

The male semen contains many more spermatozoa than science has specified. These move spasmodically and are fed by a special calorific matter, which transmits movement to the spermatozoa, and pushes it forward.

Thus, each spermatozoon, from the many millions that co-exist in the semen, represents an entity in the **Transit Centre** that is certain to be reincarnated. Therefore, amongst the millions of spirits a struggle develops as to which one will be able to best protect the assigned spermatozoon.

The spirit that has acquired more strength in Heaven, is therefore interested to protect its best seed. Because each spermatozoon is like a preliminary seed. The struggle between entities takes place in Heaven using radiations, so whichever wins with its radiation, secures its return to Earth.

As I explained each spermatozoon moves with the radiation of the corresponding spirit. This struggle is rough and hard because a war of strength and endurance rages between the spermatozoa. But the real struggle using radiations, takes place between the spirits that strengthens the corresponding spermatozoa. You can appreciate how difficult this struggle is and with how much difficulty a spirit manages to win by itself its reincarnation on Earth.

When the winner enters into the vagina of the woman, under the direction of the corresponding spirit, and enters the chamber of feeding and its connection, the woman remains pregnant until the

[21:106-108]
{26 Nov 1974}

*The **Transit Centre** or 'Soul Terminal' constitutes the linking point between the material and non-material (Heaven) worlds. This centre is both the centre for ascending (returning to Heaven) and descending (to be reincarnated) psycho-spiritual entities. The Transit Centre being akin to an airport passenger terminal, where tickets, visas etc are issued subject to certain conditions.*

NB: This airport terminal also contains reform-holding compartments (holding cells).

time arrives for it to exit from the vagina and immediately ready to enter into it, the new motive power, is the soul.

During the process of pregnancy, there are many dangers as much from the mother as from the spontaneous entry of the spermatozoon in the mother's vagina aided by forces foreign to the Spiritual World. That is how premature deaths of the newborn occur.

The appearance of a new young man on Earth is complex. There are an infinite number of cases that I am unable to include in this small note to give you an idea of what happens.

After all that I say, tell me is there or is there not a higher Authority that oversees everything with such harmony so that one can admire the great work of God.

This image, even though incomplete, brings before your eyes an unknown world with continuous struggle. That is why the Spiritual World has stressed that Man represents a special Universe that includes future citizens to whom it is not possible to give Divine Breath - only to very few. You can now understand the density of souls that exist in the Transit Centre.

From the society of families depends the level of your community. If you are not enlightened well during secondary school and enter university, instead of enlightening your brothers you will confuse their minds.

Miscarriage

PHARAH: My dear brothers, this subject is very complicated but I will try to give you a simple explanation about the woman you have mentioned.

When an embryo of advanced age is delivered dead from the mother's womb, it is a birth without soul.

A psycho-spiritual entity chose the mother for its reincarnation but when descending to Earth instead of entering the chosen mother - it did not, and waited to enter into another. The entity is returned to its starting place and waits for new directions from the Spiritual World.

This is one of many cases and especially for the sister you have mentioned. In other circumstances for the same sister it is possible for something else to occur. We organize all these within a second. I gave this explanation to satisfy your curiosity. If I continue with other cases, then I would need, only on this topic, an earthly year.

Obstruction of conception by technical means

PHARAH: The drugs that obstruct conception are partly harmful to the health. If the human organism is weak at a specific place, then a seat (of disease) develops and you are unable perceive from where the misfortune came.

NB:

It is reported:

www.abc.net.au/news/stories on 3 May 2011 that men with apparently healthy sperm could still be infertile due to a 'chaperone' protein, which prevents the spermatozoon to recognise the egg.

Monthly magazine of the
Spiritualist Society of
Athens.

Number 437;p2-3; Jan 2010
{18 Apr 1970}

[20:55-56]
{11 May 1969}

When because of her health, a woman has to avoid conception or to abort the fetus then this is not a sin because of her duty to preserve her life.

But when a maiden or married woman conceives out of wedlock etc, she has no right to attend the doctor and abort.

When she wanted to taste the “apple” where was her spirit? Has she done everything she could to avoid it? It is her duty to bear the fruit of the seeding, because this has been determined from Above. We forgive this social error if she accepts the new life, as an extension of the life of the **tree**. That is, the new sprout which is an extension of life.

tree: here it refers to the genealogical tree.

Without a serious reason avoidance of conception is not allowed. Because imagine, if all the women systematically did this, then the Divine plan would not be realised. This is because the souls through the woman, who constitutes the organ for this, make it possible for them to incarnate for their expiation.

Therefore, the church correctly places obstacles. The priest though, if he has a broad spirit knows by inspiration when to forgive and when to punish.

Why abortions must be avoided

PHARAH: I refer to the fetuses that are in the womb of their mother. Let me call them **phytozoa** because they develop like plants. When the mother feels the movements of the phytozoon inside her, it does not follow that this has a soul. But many men, particularly doctors, have the conviction that these phytozoa or fetuses (or embryos) really have a soul. Science is deceived, because it does not know the unknown of Divine Creation.

[20:255-256] and [21:56-57]
{26 Oct 1972} and {24 Oct 1973}

fetus (from Latin) = embryo (from Greek).

Why has Divinity for so many years let it be understood that the phytozoa have a soul and let the Law forbid abortions? Heaven has not enlightened all on this point, precisely to avoid the removal of phytozoa from the mother’s womb.

phytozoa: *The name is obsolete in modern science. (in Greek φυτοζωα = phytozoa). [at earlier times it was called zoophyte; also φυτο=phyto=plant] and is the plural of (one) phytozoon.*

For many years We have enlightened you on this subject. And today, to complete, I will mention the reason for avoiding abortions: Because this way you delay Divine Providence.

NB:

St Augustine (354-430 CE) accepted the Aristotelian concept of “delayed ensoulment”. He wrote that a human soul cannot live in an unformed body. Thus, early in pregnancy an abortion is not wrong because no soul is destroyed (or, more accurately, only a vegetable or animal soul is terminated).

Psycho-spiritual entities must receive flesh and bones, because amongst them there are entities with a mission, a small one but important for you mortals.

When one family has enough children and does not want any more because of financial difficulties, it is possible to take measures so that it does not have to resort to abortions. This way, the descending spirit is immediately transferred elsewhere, and no one becomes able to deny of its entry to the earthly world.

I believe that you have understood well all that I have developed

about this point that encapsulates the creation of the world.

PHARAH: Brother, abortion in the first instance is a mistake due to ignorance based on prevailing conventions and perceptions. Secondly, it is preferable that it is not carried out because it delays Divine Providence in the development of the necessary reappearances of entities for their development and fulfilment of their duties.

In very few cases abortion is permitted. This situation belongs to exceptional forced decisions.

All women, in the main, know they are subject to the Law of Nature to conceive. If for one reason or another, they prefer to avoid conception, they should take appropriate measures. This does not mean that they do not wish to become mothers.

But if through imprudence, they do not take into consideration that during their weakness of erotic intensity it is possible to conceive, then they are obliged to be subjected to the consequences, irrespective how harsh they are and maintain their pregnancy without timidity and shame so that they do not become an obstacle to Divine work.

Because when it is decided by Heaven for an entity - he or she - to descend into the 'under construction body', you do not have the right to knowingly reject it. This action is considered as disobedience to the specified plan of Heavenly decisions.

If a woman wishes to conceive without having a legal husband with whom she has liaisons and without obliging him to legalise it, because she wanted it, then society has no right to consider her lowly, and shameless and ignore her. Her attitude should be courageous, with high morale, knowing that she is within the physical Law.

If men, in this situation have placed unnatural barriers, this was because a woman from lack of volition and imprudence is easily converted to a common rabbit state.

The cases of abortions differ in kind, as is the position of the woman in front of Heaven.

Does the fetus have a spirit

PHARAH: As the Light of the Lord I come to bless my dear brothers and wish them a good start for the séances. These séances aim to enlighten you in many ways for both the earthly as well as the Heavenly knowledge.

When an entity is in Heaven, it is a psycho-spiritual entity. That is, the soul is *inseparably* linked with the spirit. I say this, because many scientists mention that the fetus dreams inside its mother. And I ask them - from where did they obtain this explanation when they

[20:126-129]
{23 Nov 1970}

themselves do not know about their unknown self?

As you know the Spiritual World does not tolerate egoists, even those that preach Love in their speeches. The Lord asks for good and pious works. Not for your benefit but for that of your fellow men.

If, as men we make mistakes, we ought to recognise them and ask for forgiveness from the Lord, we then open up a new road for the ascent of our soul and the development of our spirit.

The mystery of pregnancy

PHARAH: As you all know a woman is an individual to complete Man because Creation develops the strength of man and not of a woman. Therefore, a woman lacks soul strength. Do not ask why; it is the Work of the Most Gracious.

As a woman is of second quality, irrespective if many men are worse than her, when a woman is pregnant, then her entity is sacred.

In the Eastern Nations the courteous treatment of these people towards a pregnant woman is widespread. Why? Because she brings into the world a new innocent life and the innocence of this microscopic fetus, that has no soul, is destined to take its place in future society.

The fetus moves by the strength of its mother. But I said that the pregnant woman is sacred, why?

Because inside her, her soul strength is fortified through another radiation which in India is called "**prana**". When the fetus sees the sunlight (as you say) then the prana strength leaves the body of the mother.

Prana is a Divine power of the Universal World that is well known to the gurus of India. It has many properties of which the gurus only mention one or two.

Today they attribute prana to the Holy Spirit. This is not correct. The radiation of the Holy Spirit has a great submitting power and is able to send part of the prana to a person, if this is necessary to be done.

This mystery of birth, men cannot analyse, but only through conjecture they talk and confirm what they do not know!

I give this light to the good and obedient faithful of the Spiritual World.

Birth of male and female

PHARAH: We send the soul to the newborn. Depending on the physical development of the embryo's shape of male or female, we send a first or second quality soul. How it develops inside the mother, as male or female, I will explain.

When the father's organism is robust - contrary to what the scientists

[20:130-131]

{3 Dec 1970}

prana: is the Sanskrit word for "vital life". It is one of the five organs of vitality or sensation: "breath", "speech", "sight", "hearing", and "thought"; In Vedanta philosophy, prana is the notion of a vital, life sustaining force of living beings and vital energy, comparable to the Chinese notion of Qi. Prana is a central concept in Ayurveda and Yoga where it is believed to flow through a network of fine subtle channels called nadis.

[20:23-24]

{28 Oct 1964}

believe – the child is born female. But when the mother’s organism is sturdier than the father’s, the child is born male. All this depends on the struggle between the spermatozoa, if the fathers are weaker and the mother’s are stronger then a male is born, and on the contrary a female is born.

Our aim is not to allow a warmongering nation to specify the gender based on government’s directive, because then unforeseen damage to the balance of genders will occur. But Nature has foreseen this point, which We for the present time keep secret.

Science cannot compete with the will and decisions of Heaven, because it will always err. The Logos is all mighty. Unfortunately, Man has not perceived this. However, Heaven knows this, the Creator not the destructor.

Bond between twins

HOMER: There are many categories of twins. We will examine the two main ones:

1. The first category is, when two or three or more spermatozoa are fertilised. In this case the twins are complete and are born one after the other within a matter of hours. It is possible for one of the twins to be male and the other female or both to be male or female. As to how the psycho-spiritual entities descend to receive the earthly garment is another topic which I will **not discuss here**.
2. The second category is, when one spermatozoon is split into two equal parts and is fed in such a way that each half of the same organism is completed into an independent embryo.

Before continuing with this case I will mention why the twins of the second category are truly twins in their thoughts, preferences, sensitivities etc. They have a very strong telepathic bond.

When two entities, as humans, have a great hatred towards each other and repeated reincarnations do not alleviate the hatred, then - according to Heavenly teachings - Divinity sends them together to Earth and helps them, by the bisection of the spermatozoon so that the embryos appear with the same **pathogeny**. These twins are either male or female but never of different gender. This twin birth is very rare, and now you can understand the reason.

You may think at first sight the pathogenesis of twins is a strange phenomenon, which your doctors are unable to explain because they are lacking Heavenly knowledge and say whatever their imagination grasps.

Both joy and sorrow are equal in both twin existences from the same spermatozoon. They are so much linked pathogenetically that any dislike from previous existences, even the smallest, totally disappears from them.

When men do not cultivate their (soul) strength and do not try to cast

[10:268-269]

not discussed here: see earlier sections.

pathogeny: (same as **pathogenesis**) the same origin and development of diseases.

out the horrible fault of hatred and continue in their various incarnations to feel such hatred for one person or another without knowing where this comes from, then Divine Providence sends them to Earth via twin birth.

About births

[20:61-63]
{24 Feb 1970}

PHARAH: To your question about multiple births, that is, how two or more souls are born from the same female entity at the same time, this is a special case, as is the case of Siamese (twins). If I were to explain the different cases, 4 volumes of 400 pages each will not be sufficient to give you even a vague idea of what occurs. That is why I will concentrate on deformed children because that is what you are asking.

When spermatozoa are weak and one attaches onto another to strengthen their egress to the material world, firstly they enter the vagina of the mother, and there many times they are compressed so much that they form one body. And because the mother for one reason or another is not able to transmit her strength, to the two or three embryos, she transmits to one, and from this one another one or more acquire strengthening. That is why on rare occasions a child is born with two heads, two hearts, and one body. Or with one head, and two hearts, because the other head has been absorbed whilst growing, whereas the hearts remained intact. Your science says: "see this strange phenomenon, the child has two hearts!"

In the majority of cases, these human creatures do not have life. It is one of the punishments in the articles of Divine Law. As soon as the creature exits from the mother's womb it receives a soul, and in a way, it is burdened to accept the situation, which is troublesome to it, without it of course, being able to speak.

I will mention another case known in the medical circles. It happens when the embryo is in its mother's womb and air gets in. The embryo does not have life but through the air it receives physical strength and it is possible for it to cry in the womb. The mother is disturbed without knowing how to explain this phenomenon. Based on this case, many doctors have the conviction that the embryo has life inside the womb. This is not true. The doctors have been deceived because they do not know the divine nature of Man and they express an opinion based on imagination. Let them engage for a while with the Spiritual World to be enlightened and then enlighten their brothers.

The embryo is in no danger whilst inside the womb even if the umbilical cord is wrapped around the neck of this miniscule entity. Nature has foreseen everything. Danger exists when the embryo is to make its exit. A special gynaecologist takes the appropriate measures for its normal exit.

I will not examine today the various and important medical cases, that despite the multiple knowledge of science, the doctors ignore, because they do not have Divine enlightenment. If they have faith in

the words of the Spiritual World, then the benefits will be many for humanity.

Man is ready to receive any illness, but his organism rejects those illnesses that he does not accept when in full health. This means, that illnesses do not go to Man, but Man goes to them, since he does not know how to repel them and he does not impose order upon himself.

I will tell you something else. Every one today occupies themselves with the various cases of cancer. And what has science produced, when on one hand it strengthens the illness and with the other seeks liberation from it?

What is harmful to the rather weak organisms is chemistry and the inhuman progress of science in the development of harmful drugs. Today you are fed chemically. In this case, why do you want to repel sure death from cancer when you yourselves in order to (financially) gain more **silver** you use chemical substances in your food? You have even destroyed the virgin lands that enrich you.

silver: money.

What are you asking from Divine Providence when you work against the directions of the Lord? Do you not know that the chemical substances contain harmful and efficacious energies for your body? And that one substance with another form poisons which create disease agents that are invisible to the best microscope of human progress? This is how technical progress benefits but also irreparably harms the men of disobedience.

About technical methods of birth

HIPPOCRATES: The artificial methods that science is considering for birth control are foolish. When a scientist manipulates cells, it is impossible for them to produce life even though they move. With instruments, Man does not multiply. But, if science wishes to create humans using the spermatozoa within special tubes, these humans will not live long because they are lacking something that the scientists have not thought of: naturalness! It is absurd that they are destroying millions of humans to create one individual.

[20:126-128]
{23 Nov 1970}

The fetus in the womb of the mother is, I repeat, without soul. It moves through the strength of its mother. Where the fetus is, it is enlivened by radiations, or let me say, animal magnetism. And if the cells outside the womb have enough intensity, they imprint their heredity on the **fetus**. Therefore, the fetus has to accept such radiation. For this reason many times the child does not resemble any one in the family. There are many such cases but I do not have the time to give a complete explanation today.

A fetus (Latin), also spelled foetus, foetus, faetus, or fætus, is a developing mammal or other viviparous vertebrate after embryonic stage and before birth.

As soon as the fetus sees the light, automatically the soul enters into it. This has no relationship to the parents. If the heredity cells are fortified and the soul cannot tolerate them, the child endures them up to a point and then dies. This is a complicated subject and I will return to elaborate.

Test tube

HIPPOCRATES: For some time now a lot of publicity has been given to the “**test tube**”. You wonder whether this is correct or not. Since it is not the tube that gives life in the seeding of man and woman, you cannot say that Man creates life. This of course, in the majority of cases, is carried out for people who cannot procreate.

From the woman’s point of view there are justifications, because of her **salpinges**. So, after the egg has been fertilised inside the test tube it is inserted deep inside the female tunnel (uterus) thus bypassing the obstacles. And so, life can survive to enable the strongest seed to produce the rest and to keep the fetus inside her **tunnel**. But from a man’s point of view, if he is sterile, then another solution, that your doctors do not yet know, needs to be found.

Until now, the child is born in good health and does not have deficiencies as compared with others. Wait and see what will be the outcome of the application of this test tube, without this action being anti-natural. If it is successful, another advance in the area of medicine will be recorded.

Trials have been carried out first on animals and with good results. Be careful only that in this situation other disturbing events from the family side do not intervene.

I do not speak with free spirit, so I do not confuse this section. Neither do I want to develop this subject in sociological depth, because I will interfere in other areas that are difficult for you and your doctors to comprehend. Confine yourselves to what you know and leave discussions on this subject alone. The test tube is a way of expediting work where it was not easy to produce results.

Correctly or incorrectly, no one has the right to criticise this action, since the parents had an absolute need for this link that the child provided to their family nucleus. When it is well intentioned, the children are flowers. However, many times instead of flowers there are weeds. Then the subject in this particular case, changes and does not belong in My jurisdiction but to another, as the Spiritual World has already given in older texts.

I am of the opinion that up to here I have partially clarified the point of your query. The clergy should not interfere where is not invited. It should try only to enlighten humans about humanity. The rest are not the exclusive prerogative of the clergy.

When does a soul enter immortality?

HIPPOCRATES: My beloved ones, earthly life has as its end, death when the soul returns to its starting point. Note! I do not say immortality!

When an earthly entity dies, you earthly ones have the impression

[21:221-222]
{5 Aug 1978}

test tube: Louise Joy Brown (born 25 July 1978, in UK, was the world's first baby to be conceived by in vitro fertilization or IVF.

salpinges: fallopian tubes also known as oviducts and uterine tubes - (named after Gabriele Fallopio or Fallopious – 16th century Italian anatomist). .

The Independent on Sunday (UK): 14 Jan 2007: Brown, the first test-tube baby in the world, has given birth to a child of her own. The boy - named Cameron - was conceived naturally and without IVF.

[21:42-44]
{28 Jun 1973}

that it has been liberated from the hardships of Earth. Yes it may have left Earth with its hardships and illnesses and entered the Heavenly plane (so you can understand me) but it waits there for its examination and the time of its return to your Earth.

Do you know how many billions of people there are on Earth? With an approximate count they exceed four (4) billion, even though other say that it is two and half to three (2.5 – 3) billion.

From all of these, only a very few have balanced! Now I believe you can understand why the souls return to your Earth and what is the aim of Anarhon for them. We all work for this aim.

For this aim We dictate Texts that are completely unknown and unpublished. They must be possessed by the whole of humanity. And those of humanity who we gain, for them the doors of Paradise will be open. For the rest, I am sorry, there is a need for them to suffer Heavenly ailments that are spiritual, as a torment for the spirit. Besides, you would have noticed that many souls ask for Our help, because the ethical pain is greater than the physical.

There are souls that are nostalgic for Earth, their old life, and they suffer. There are others who hold a grudge against their brothers who were unjust to them. And there are many others. These souls remain for a long earthly time in Heaven, until they moderate their ego, hate, nostalgia towards matter, ambition, easy conquests and much more.

All these souls are taught daily by various Teachers, so that they can be helped with their understanding of the reason for their return to Earth and what they need to be taught so they can achieve balance.

However, when a balanced soul dies, that is, it finds darkness, from darkness it is reborn into a new life in Heaven, called "Immortality". I speak about the balanced souls that depending on their progress ascend the Stations, until they arrive and enter the Station of Repose.

With them in the Stations co-exist other souls that have gained Station B, Γ, Δ etc. but are still lacking something. That is, they are not completely balanced. They carried out virtuous actions, had a strong spirit but not soul strength. From these souls that are substantial in number, some are sent to Earth to increase their soul strength. Therefore, they have not gained Immortality but only Heavenly life up to a point.

I give you these images, so you can understand something more than you already know.

Because the cultivation of entities is lengthy, in earthly time, it is called "eternity". Whereas, true Eternity is enjoyed by the souls that will never return to Earth, the great workshop of their education that We call Station Alpha.

In 1973 when this Teaching was given, Earth's population was 3.9 billion (source World Bank).

Try, my beloved ones, as far as your strength allows, to judge yourself subjectively. Never justify yourself without knowing what is “Justice” so that you can gain the favour of the Divine, and through It balance for your benefit. By helping the Divine, that is Divine Providence, you will at some stage enjoy in Eternity the plentiful and unknown gifts of God for a new, brilliant, bright, glittering World of the future New Creation.

Bibliography

The Bibliography and references are given in a separate document called “References-Bibliography.pdf” available from the website www.divinepharos.org.
