

7. Spiritual Medicine - III

"Jesus With the Doctors" by Gustave Doré

Doré Bible Illustrations • Free to Copy
www.creationism.org/images/

Luk 2:46-47 ...they found him in the temple, sitting in the midst of the doctors, both hearing them, and asking them questions. And all that heard him were astonished at his understanding and answers.

Preamble

The Spiritualist Society of Athens “The Divine Light” published two books that primarily contain teaching by Hippocrates [20] and [21]. I have translated excerpts from these two books and have added some teachings by Homer from [10]. All the teachings relate to medicine and the medical profession. Because of the large number of topics I have divided them into three monographs (Monographs 5, 6 and 7) that group together selected medical areas. The Greek texts are given in chronological order, whereas the monographs are groupings of topics. In the monographs, I have provided the reference as well as the day/date that the Teaching was delivered

Hippocrates, the greatest of all earthly physicians is the head of a spiritual group of doctors that the Lord Jesus Christ has created.

It has to be stressed that the early scientists wrongly coined the term psychiatry and psychiatric illness. A clarification of this mistranslation is given in the monographs and the importance of looking after our bodies is explained.

From 1970 until the completion of the Teachings, the Spiritual Society of Athens ran a “therapeutic branch” where many sufferers attended and sought advice regarding their illnesses. Some of the dialogues between patients and Spiritual Teachers are given in the Greek texts, but I have omitted them.

The Spiritualist Society of Athens “The Divine Light” is currently translating into English the two above-mentioned volumes. Further information is available from their website: divinelight.org.gr.

This series of monographs complements the four books in the series “The Purpose of Earthly Life” which can be downloaded free from the website www.divinepharos.org.

The two sacred professions

HOMER: There are many vocations, professions, trades etc. Scientists practice in one of the many professional specializations.

Man is free to choose his profession and if it does not satisfy him, he is able to change to one that is more profitable for him.

But do not choose one of the two special professions if you are unaware of their purpose. These two professions, that have now become financially sordid, are sacred. As such you ought to respect the promise that you gave before deciding to follow them.

One of these professions is that of a priest and the other of a doctor. If you choose these for enrichment, I warn you that in Heaven you will give account for this and you will be judged as unworthy of the sacred mission on Earth. The stages that you will go through in the ether will be very harsh and difficult for your expiation. The Spiritual World will not take your sincere repentance into consideration, because sincerity is not an indication of your good will where there is no profit. You should have thought of all this at the time that you were on Earth surrounded by tempting benefits.

Men with foolish thoughts, why do you not wake up from your spiritual torpor, to see and feel the beauty of Goodness and Piety?

Who keeps you bound to the chariot of your bad behavior towards your fellow men?

You ignore that the Lord has suffered for you, to save your souls.

Why do you not imitate a millionth of His actions, so you can find yourself on the correct path that He has planned for you?

Why do you accept the teaching of our Lord but in practice you ignore it?

Don't you know that the spirit of The Cunning One incites you, without you realizing it?

What excuse will you give to your subconscious when it rejects all your justifications?

Finally, do you believe in the Almightyness of Who has created you?

In this case, wait to see the radiating Truth with your own eyes and the just punishment of your entity in Heaven.

Priests and Pharisees,

You who apply yourselves to the study of the Scriptures and in parrot fashion recite the sacred texts that have no appeal in your heart;

*The **Pharisees** meaning "set apart") were at various times a political party, a social movement, and a school of thought among Jews during the Second Temple period under the Hasmonean dynasty (140–37 BCE) in the wake of the Maccabean revolt.*

You who compete to acquire gold and who quarrel amongst yourselves as hungry falcons;
You who severely censure the faults of the faithful and forgive the atrocities of your entity;
You who enter politics and by necessity act against your enemies;
You who deep down have nothing sacred and holy, and many times blaspheme even the Divine,
You will be the first of all them to wander as a group of monks as the outcasts of Heaven.

I have spoken, however unfortunately you do not have ears but a double stomach.

A doctor, in its key meaning, is a man who self sacrifices. But the opposite occurs, he sacrifices much to acquire experience, wealth and fame.

A doctor, who is not aware of his sacred duty, is not a doctor but is a merchant of his fellow men's lives. The great Hippocrates foresaw the sanctity of this profession and for this reason he wrote an **OATH** for his students, which today is not taken into consideration by those who study medicine. The oath is given because of established practice rather than because of its resonance with their souls.

*OATH: see monograph 5
Spiritual Medicine I.*

Other than a very few, because there are always exceptions, the majority of them compete amongst themselves, who through contacts will be worthy of a great fame which will enable them to acquire clients. Clients for them mean profit.

The doctors have polluted their sacred profession and despite all the effort and progress, they are found lacking, because of their conduct. They are not conscious of their oath when they practice.

It is very sad for these two professions to travel along the wrong path and to deviate from the Divine Light of the Creator, by entering the radiation of the Evil Spirit. Let it be known that the Cunning One will lead them where they deserve to go.

I have spoken; you consider your responsibilities.

The harmful consequences of medication

HIPPOCRATES: My dear brethren, I am again amongst you first as a brother and second as a doctor.

The Brotherhood of Heaven is completely different from your brotherhood in your World. The Brothers in Heaven are united; it is an invisible power of Divinity, whereas the brotherhood on your earth is treacherous. It is insincere, lacks reliability and one undermines the other.

Why do you want to call yourselves brothers, when one is acting

*[21:136-137]
{13 Nov 1975}*

against the other to break down the brotherhood and one faces the other as an enemy.

Have you lost your judgement? Don't you see? Don't you listen? Can you not perceive who are the ones that divide you?

And instead of medical science entering as a benefactor, it enters only into experimentation, often incomplete, to destroy more quickly the flourishing health of your brothers.

Most of the medication that is circulated today for all ailments poisons the body. It destroys the memory, impregnates your stomach through a special substance that is generated inside you that you call side effect.

Even though there are many simple and harmless means, you only pay attention to expensive medication that instead of curing aggravates the situation.

Illnesses and medication

HIPPOCRATES: One doctor has the opinion that his medication is what the patient requires whereas the other disagrees and refers him to another remedy.

[21:153-154]
{20 May 1976}

Which of the two is telling the truth, when they do not have any idea of the results of the two medications on this or another patient.

Why does this happen?

Because they do not have Divine Enlightenment! They are totally lacking it; otherwise, they would be prudent if they were not sure whether or not this medication or another is harmless, even if it is not for this patient's condition.

For each illness, there are millions of medications. From all these medications are you sure which one will cure this illness, when you do not know the patient's body well, and whether he is able to take any one of these medications.

The doctor's responsibility is great, but the doctors as they appear today are not interested in whether the patient is cured or not as long as they themselves are well and their reputation is rising as a caring doctor, although unfortunately, more expensive than the others. That is, they deceive the patients for their own benefit at the expense of their patients.

No one who is working in the production of medication is scrupulous. This has been validated many times in your world with the publicity of medication that has harmed the patients irreparably.

Where can the Spiritual World begin to eliminate all that is wrong? But We do not have the right from the Highest Authority to intervene for the salvation of one or the other if it has not been specified by the

Authority Itself that permeates everything and that has the absolute authority of all the invisible powers in Its Hands.

We help where there is a need, because We already know Anarhon's decision. We never discourage anyone, because discouragement is short and is a double-death whereas encouragement and optimism is a great path for the cleansing of the illness.

The discovery of chemical medication using animals

HIPPOCRATES: My dear ones, to some extent a small consumption of medication by the patient helps in the partial improvement of his health. I say partial because as soon as the patient recovers he begins to abuse the measure. If he did not do this and was careful about his health over a long time then he would have rediscovered it completely.

[21:168-169]
{13 Jan 1977}

You have questioned how many pharmaceutical companies exist in the world? The statistics that you have been given are wrong because only the very large factories of chemical products are counted, whereas the number of medications is the same as half the population of your planet.

What happens to them? They are distributed in the market as miracles! And truly they are such, from the point of view of the gain of those who exploit them. Men are so stupid that with various chemical products they spray even the earth's pure food such as potatoes, green crops, fruit etc.

The same that happens to men taking vitamins happens with the produce from earth. The produce grows by absorbing harmful substances and instead of benefiting humanity, harms it.

The main product from earth is bread. Unfortunately, it is not the same as it was sixty or seventy years ago, because the merchants of death take care of themselves only and forget that they themselves in similar circumstances fall into the trap of other products and therefore will not be able to avoid harm.

You are all in a poisonous atmosphere and this way you generate illnesses, which you could avoid. Some of the key illnesses are cancer, loss of memory (dementia), perceptive confusion.

Shall I give you some advice? But who is listening to the advice when all those that are able to apply My direction are hostile to good advice and are enemies of Truth. May the Lord help you so you can see His Light, so you will be able to watch your steps in the darkness.

Explanation of Heavenly medication

PASTEUR: My dear friends, when We give a medication for three or four people with different ailments, the following happens:

[20:100]
{25 Jul 1970}

Assume that three of those are seeking a cure. The medication has

as its base a substance, and assume that We give it the colour blue. Blessing the first cup or small bottle, the energy has the colour red then the colour of the cup's content becomes purple. The second takes the energy of the colour yellow and the result is that the content of the second cup changed to green. To the third, the energy is white with the result it becomes sky-blue. The bases were the same. The differences are three in number.

Using colours, I wanted to show the attribute of each cup or small bottle. This subject is very difficult to develop by another method. I chose the simplest. I believe that you have understood Me.

Spiritual energy through radiation

PASTEUR: My brethren, I had Divine inspirations and My many inventions were based on these. Without being a doctor, I cured people of sin. And now as a Spirit I will be active because I have great knowledge about the needs of the human body.

We appear one after the other to convince you that there are many of Us who have undertaken to intervene in your ailments.

When the Spiritual World gives a simple medication, maybe this is considered laughable in the eyes of science, because science does not know the substance of each element.

At another time one of the Teachers expanded that water does not consist of only two or three elements. **Do you remember how many?** Thus, even what may be simple to your knowledge has many elements on which the Spiritual World can act through radiations, so that the medication can be effective. We will provide you with the analysis of every medication so that you can be convinced that there is no harmful substance but that it is very beneficial for those who are about to take it.

Let Me bless some water, depositing some of Our energy. This water is for ... (patient not named). It will not work if another person drinks it. This is because every blessing of the Spiritual World has an analogous radiation.

The blessed water

HIPPOCRATES: My dear ones, the water that the Spiritual World offers you is for the purification of your soul. Because when the soul has strength, it can cure every physical and spiritual ailment. Therefore, the water that you **drank** has the blessing of the Spiritual World.

The water that is given by the Brotherhood of Invisible Doctors has other attributes. According to the need of each entity, the blessing is strength of a different energy. For you, of course, it is the same. Water the one, water the other. For Us though, that understand such Heavenly Mysteries it is different. For this reason, when some of the faithful seek the help of the Spiritual World for a cure using water, there must be no more than five cups. So that the rest of the

Louis Pasteur French (1822- 1895) was a French chemist and microbiologist. He is remembered for his remarkable breakthroughs in the causes and preventions of diseases.

[20:76-77]
{26 May 1970}

Do you remember how many? In a previous communication Lord Pharah stated that water consists of 250 elements not just oxygen and hydrogen.

[20:203-204]
{15 Nov 1971}

drank: prior to the commencement of a séance at the Spiritual Society of Athens "The Divine Light", participants drank blessed water.

brethren are not displeased, let them wait for the next time to receive the blessed water that they need for their ailments.

There is no need to tell the medium which ailment it is that they are seeking the blessed water for, which is Our Offering of the Divine to you. In this case, We know the appropriate blessing that the faithful seek.

Later on it is possible, that in a glass cup with wide rim full of water and blessed by Us, that you will see inside it the head of Hippocrates. This depends on you and not on Heaven. By you harmonising your strengths with the Lord as the centre of your energies, it would be possible to see what until now, you do not believe. Thus, We hope to silence those that have doubts about the Personalities of Heaven.

I will ask that the brethren who come here to pray for their brothers, who do not know what is spiritualism and who have no idea about its energy, that they do not ask too much from Us. Let them first learn how to ask for Our help, for Us to be able to give it.

Chemical poisons

HIPPOCRATES: My dear ones, many times I have spoken about the environment, the poisonous atmosphere of the big cities of the Greek lands and the produce of your Earth.

The whole population of Greece, except for a small percentage, is poisoned daily without them realising it.

The first duty of your responsible authority is to avoid the poisonous liquids with which you spray the trees, vegetables and fruit. They harm even the producers. Who gives licences for those poisons to be imported by the farmers of your earth, who do not know when and how to spray.

There are other types of liquids that could be used. But who cares about the health of your nation, including the authorities that do not understand that through their narrow-mindedness, they are being deceived by the advertising of such products by the multi-national companies.

The death rate of the citizens will be much greater if the situation continues as is. They all congregate in the big cities and they desert their villages. It is not because they want to live the city life, but they are forced to do so when the authorities do not demonstrate the necessary commitment to them.

In this area, it is your duty to say the plain truth, because those that are not hungry do not have the disposition to listen to the truth, as this is at their expense.

The dangerous medications

HIPPOCRATES: My dear ones, you have known for a long time

[21:186-187]
{30 Jun 1977}

[21:193-194]
{10 Nov 1977}

what I have been telling you about medications and how dangerous they are for man's body. At last some of you have understood it and proclaim it. This is a special enlightenment for them.

It is best that you return to herbs. From them they do not extract substances to unscrupulously produce medication, even though they mix other harmless substances with them even in small quantities.

Tell Me, from a thousand people how many suffer? ... half of them. Some seriously and others mildly and some from neurological diseases etc. Why should We not prevent and guide you to the Light so that darkness does not confuse you?

Seldom will We give you medication that you can prepare according to your idiosyncrasy. Where have you heard that simple water acts benevolently on your body? But when this contains radiations from Divine Blessing, not only believers but also disbelievers can be cured, if this is permitted. There is no reason to refer to those things that I have stressed at other times. The radiation in the water is not only Mine but is also from My collaborators, those who are here with Me, of course.

But if there is a case, where one from the many does not benefit, his query will be answered by the Spiritual World, so that he will not remain in suspense not knowing what is happening to him. In the case of obedience, I am strict because only this way am I able to help you. If you do not obey My directions then it is not the Spiritual World that is at fault but you who have disobeyed.

The odourless poison

HIPPOCRATES: Today I appear so I can enlighten you on another subject that concerns humanity a lot and especially Me as a doctor, that is, the unknown until now odourless poison.

Of course, many of you may not know that thousands of people die from heart diseases. Most of them are not natural as you may think. In a Western country, most of the victims were used as experimental animals by the hidden chemicals of its Intelligence Service.

For the production of such poison, there is a need for intense development including the mixture with other special poisons so to become liquid, tasteless and odourless. It is kept secret by the infernal usurpers of all periods and all professions who for many years have used it on innocent entities to experiment and to check its efficiency.

There are some of these trusted type of people that have managed through their agents to kill many personalities; personalities that were an obstacle to their work, all of whom were victims of this poison. I will mention a few names known to you. Without tiring you, I will mention some two hundred (200) of those people, known but not to you.

[21:234-235]

{8 Mar 1979}

Metaxas: (1871–1941)
appointed the 130th Prime
Minister of Greece between
April and August 1936; and
dictator from 1936 until his
death in 1941.

This liquid is transmitted by injection into fruit, sweets, meats, foods and many more and has the property to define the length of time of life for each victim. It is impossible for medicine and chemistry to find the synthesis of this poison. As much as they examine and research the specialist scientist will not discover anything because death was due to technical means.

I refer to **Metaxas, Najib Nasser, Makarios, Crossland, Boumediene**. The last one that I cannot tell you if he is going to survive is Genser of Germany.

Such poison, deadly and unknown to many people, is prepared in your country also. Who is being targeted? I am unable to say. But it is up to him to be careful and not to be taken to many gatherings, even if he knows them and according to his perception, there is no danger of being poisoned.

Precisely, when politicians or men of high repute such as scientists speak against the rotten establishment and it does not suit the Devil on Earth, their silencing is imminent.

Those in danger should take strict measures. I do my duty and warn you. What you are going to do is up to you.

I think I have to enlighten you on this liquid that is being used even in sealed alcoholic drink bottles so those drinking cannot perceive that it contains their death. There are many thousands who die from cardiac arrest.

From an autopsy, there is a way to confirm how this liquid works but it is best that I do not mention it for the time being; if there is a need I will return.

The doctor is responsible for the spread of diseases

ST NICHOLAS: My brethren, justly you wonder how is it possible for a doctor to be responsible for the spread of diseases? Was he not the same one who took care to cure the sick? When he is conscientious is he not concerned for the health of his client? As a practitioner, does he not have a sacred duty to help his fellow man who cannot pay? Does he not assist at any time the needs of your bodily defects? What is it that the doctor is lacking when illnesses come from thousands of other factors?

To these queries, I answer: The doctor is a man with sacred duties, which unfortunately he ignores or neglects. Most of today's doctors have converted to being merchants of bad faith competing with the magnates of money for wealth and goods.

Of course, there are some doctors, still unknown who work as assistants to the famous doctors but that does not stop them at the appropriate instance from waving their magic wand and being transformed into powerful persons of government. The doctor has stopped being who he ought to be.

Nasser: Gamal Abdel Nasser Hussein 15 January 1918 – 28 September 1970) was the second President of Egypt from 1956 until his death in 1970.

Makarios: (August 13, 1913 – August 3, 1977) the first President of Cyprus (1960–1977) until his death 1977.

Crossland: Charles Anthony Raven Crossland (29 August 1918–19 February 1977), was a British Labour Party politician and author. Occupied the cabinet positions of Sec of State for Educations and Science, President Of the Board of Trade, Sec of State for Local Gvt and Regional Planning, and Foreign Secretary. Died in Office.

Boumediene: Houari Boumediène, 23 August 1932 – 27 December 1978) the 4th President of Algeria to his death 1978.

[20:29-31]
{25 Feb 1965}

Saint Nicholas (Greek: Άγιος Νικόλαος, Hagios ["holy"] Nikolaos ["victory of the people"]) (270–6 December 343), also called Nikolaos of Myra was a historic 4th century saint and Greek Bishop of Myra and defender of Orthodoxy. Because of the many miracles attributed to his intercession, he is also known as Nikolaos the Wonderworker (Greek: Νικόλαος ο Θαυματουργός, Nikolaos o Thaumaturgos). He is one of the three Holy Hierarchs.

Today, doctors and industrialists collaborate, acquire wealth and produce medications that are harmful to your health. The components are such that they produce side effects that impede the diagnosis of an ailment.

The production of medications should be in the hands of government on the condition that it remains conscientious in order to stop the many variations of medication for one disease being produced and that the medication is used at the correct dose, analogous with the constitution and need of each patient.

The doctor ought to acquire experience in the amount of dilution and method of preparation of the medication. With the medical trials of doctors and the lazy way of enrichment of the chemist the standardisation of medication is wrong.

Each man is a special ground that the attending doctor should examine and study as a geologist and then prescribe the appropriate medication.

When the doctor does not combine the necessary substances that are indicated for his patients to take, and the chemist is no longer the manufacturer of the medication according to the prescription from the doctor then the medications increase in number incredibly. This way the doctors distance themselves from personal experience and the chemists become supermarkets.

The many and inappropriate medications destroy the life of men and create susceptibility in the heart, confusion to the spirit, acute illness of the lungs and invisible centres of malignant growths, incurable neurosis etc.

The area of diseases belongs to the doctors. Therefore, the doctors are responsible for the transmission of illnesses. They have not understood the harm that medication causes for the enrichment of some and they become inactive, relying on their standard poisons which although they say do not cause harm, secretly, they poison the body.

To save the world from the disgraceful action of the pharmaceutical merchants, the state is the only appropriate body that can end this wide poisoning of nations.

The weight of the bad pharmaceutical business lies totally on the doctors whose brain has stopped working with physiological rhythm. The profitability above all, has poisoned the sacredness of doctors and wealth has corrupted their conscience.

Who is the dutiful doctor?

PAOLO MANTEGAZZA: I bless the faithful in the name of this association and the Lord.

[20:241-242]
{18 May 1972}

My brethren, with sorrow I see that medicine is no longer a science but commerce. There are very few who are truly interested in Man. The rest are all concerned about how to accumulate more goods for themselves without considering their other brethren.

Most of the factories in your world that manufacture medications are practising pure fraud. The Spiritual World approves of very few of these medications. All the others produce side effects harming the patients irrevocably. Why does this thing happen? Because the wise men have become stupid. A lot of knowledge without Divine control creates strange situations for Man as well as for nations.

Not only does medicine go backwards but it impedes other branches, because all these scientists follow the same road. They are not enlightened and they are of the opinion that they are gods! They do not perceive that egoism destroys the good quality of their entity and makes them greedy. They are not interested in saving their brother. They save him if they can, so they can acquire fame and clients whereas the duty of a doctor is to self-sacrifice to save his client.

My dear brethren do you know of a doctor who has self-sacrificed for the benefit of his patient? This means that when the doctor self-sacrifices he understands his sacred and difficult task.

First every doctor must know the anatomy of Man well. To know the most sensitive parts from which with the help always of the Divine he can draw conclusions and succeed where many have failed, that is, a good diagnosis is made.

If a doctor is unsure of the patient's diagnosis and gives him medication for a cure, he commits a crime, because he is experimenting. There are other methods of experimentation to assist the doctors to gain experience, but not on Man.

And there are also the mistakes made by doctors. The doctors must also be sociologists. Their knowledge should not be one sided, because if they are such, they follow the profession of enrichment and not of sacred duty.

They have a terrible memory because they forget the Hippocratic Oath. However, they whisper it parrot fashion and never remember it when they are working.

We will take very strict measures against those doctors who do not follow their sacred duty. Lord Hippocrates is very upset with them. He will help, as will the rest of Us, the few that are primarily human who do not have the acquisition of wealth as their aim but the salvation of their brothers.

Great is the Power of Heaven

HIPPOCRATES: It is of a great necessity for you men to know that the Spiritual World does not sleep but operates unceasingly as a perpetual divine engine of the universal world.

Paolo Mantegazza was born in Monza October (1831-1910). After spending his student-days at the universities of Pisa and Milan, he gained his MD degree at Pavia in 1854. He was appointed surgeon at Milan Hospital and Professor of Pathology at Pavia. Here he initiated the first Museum of Anthropology and Ethnology in Italy; He was the object of fierce attacks because of the extent to which he practiced vivisection. During a time when the popular and official science and culture in Italy were still influenced by the Roman Catholic Church, Mantegazza was a staunch liberal and defended the ideas of Darwinism.

[21:73-74]

{21 Mar 1974}

Unfortunately, you do not have the inspiration to pose questions about the many images that have to be interpreted and you wait for Us to tell you some aspects of what is permitted of the Heavenly Mysteries.

The power of the Heavenly Kingdom is great and some of you have perceived this. Wake up! Instead of asking Us the silly questions that you normally do, let your spirit roam and ask Us to interpret that which is necessary to improve your knowledge. Because if you do not have Divine knowledge, all other acquired earthly knowledge is useless in Heaven.

Here there are souls unknown to you. They were poor entities, uneducated, but good hearted and they have senior places here. On the contrary, men of Letters, of Arts, men who were wealthy, are considered to be totally useless in Heaven. Even though some of them belonged to Spiritual Circles as Guides to show the faithful that they know a lot ... but, they never knew nor do they know until now all that the souls say from Heaven.

We help the simple, the sincere, the innocent and those who are faithful to the Spiritual World. It is not only My Sector that in future will give you new directions but other sectors such as the Philosophical & Mathematics sector, so you can understand what relation exists between Heavenly mathematics and the whole life of the human race.

Do not forget that one earthly entity is linked with another unknown entity. How this happens, is Our business and not yours.

The same happens with the stars. Each star has a special influence on another, and together they deliver, according to Divine Will, analogous energies on Anarhon's Treasury, which as you know is your Earth.

With today's conditions of life and the general lawlessness of men, it is difficult for Us to go forward with your liberation from the most malignant illness. We, because of Our debt towards Man, We will cure those who ought to be cured. As for the others, I am sorry; We are not allowed to intervene.

Psychiatry

HOMER: The word "**psychiatry**" is incomprehensible. What are the psychiatrists trying to cure, when they do not know what is the meaning of psyche (soul)?

We have said many times and we repeat it, that the soul is the Divine Breath, that is an infinitesimal ray that remains diffused inside the human entity. Therefore, this Divine ray is energy that moves the body, that is, the whole human organism. It has no relation to the illnesses of the body.

[10:281-282]

*the word **psychiatry** was first coined by the German physician Johann Christian Reil in 1808. The mistranslation is based on translating the Greek word 'psyche' as 'mind' instead of 'soul'.*

Every human has something sacred inside him. This is nothing other than the Divine Breath, the soul, which is also called 'small god', since it is a ray of Him.

How could your doctors imagine that they could create a branch of psychiatry? To cure what? Your inner unknown god? The notion of this word is a great failure.

Those of you who have encyclopaedic education, know that God cannot be analysed. Therefore, even a very faint ray of His, the soul, cannot be analysed; it is as eternal as He is.

The work of this Divine Breath is to enliven the whole entity. This energy of the soul has no relation to your spirit; except that there is an inseparable bond between soul and spirit.

How did the doctors discover soul illnesses? What made them think that it is possible for the soul to be sick? Is it possible for God to be sick? Since they do not know what God is how is it possible to know the soul?

Let us examine what illnesses you assign to the psyche, out of obvious ignorance and lack of Divine Light.

You are melancholic, have fixed ideas, you are nostalgic, have periodic episodes of spiritual disturbance or as you say psychological traumas, amnesia, the sudden trembling etc. All these illnesses are derived from the spirit and you ought to name them "cerebral". The loosening of nerves and the influence of images are transformed into multifaceted anguish that affects the brain and not the soul.

The soul, as an immaterial energy does not need medication. Moreover, you would have noticed that medication acts upon the organism (the soul is not a physical organ) and frequently it worsens the condition of the patient instead of improving it.

What is nostalgia? It is images of the past to which you cannot return and your great desire is to relive them. Nostalgia creates withering.

The images have no relation to the soul, but only to the spirit that recalls moments, hours and days that had an influence on your memory. Therefore, nostalgia, as well as similar conditions, does not belong to the soul but to cerebral illnesses.

"Psychic illness" (soul illness) is a wrong expression. The soul is **not** an organ of the body, it is breath and as such does not need therapy. It is absolutely necessary for the minds that go backwards into the darkness of ignorance, to undergo appropriate therapy.

Soul and brain

HOMER: The human **encephalos** (brain) is a perfect apparatus that operates with the spirit's energy.

NB: The Bible portrays the concept of soul most commonly using the Hebrew word nephesh and the Greek word psyche. The Greek Septuagint mostly uses psyche (Ψυχη) to translate nephesh. English translations of the Bible use the word "soul" to translate nephesh in the Hebrew Bible and psyche in the New Testament. The New Testament follows the terminology of the Septuagint.

[10:245-247]

brain = in Latin cerebrum.

The soul is diffused throughout the body of an entity and is a Divine Breath for the whole movement of the mechanism that is called Man. It is at the same time inseparably connected with the spirit and thus combined, it is called a “psycho-spiritual entity”.

The soul is enclosed within the material cover called the body. But the spirit is enclosed in the brain. The brain is enclosed in the encephalon, that is, the spirit for its disobedience is imprisoned twice within the body.

The soul has a wider horizon whereas the horizon of the spirit is narrow; it has certain limits to its expansion. However, when the soul cooperates with the spirit, the spirit’s horizons are wider and the limits of inspiration are extended.

When the soul, because of its weak strength, is unable to cooperate with the spirit, then the spirit has narrow views on all subjects and it ignores all the reasons for its existence. In this particular case, Man becomes **monolithic**, an unbeliever or exaggeratedly religious, silly or gullible, wicked or incorrigible, frivolous or volatile. The spirit does not have a solid foundation and therefore it cannot understand the simplest beneficial blessings of its life. It abuses nature itself and enters into erroneous perceptions of knowledge. These men become stubborn and malicious, stubborn and negative in the delivery of what is required.

Bear in mind that the brain is not the spirit but is the garment for the spirit. As the garment may not fit your body, because the tailor made it wider or very tight, the same happens with your spirit, because of your weak soul strength.

The spirit enters the brain and is unable to adapt to its garment by itself. If it cooperated with the soul, then the soul as an excellent tailor will adjust the garment according to the measure of the spirit.

By this example, I hope that I have familiarised you well, so you can understand the energy of the soul on the brain.

The soul and the brain at first sight have no relation to one another, because when the soul leaves the body, the brain remains in it and is converted to dust as is the body. The departing soul attracts the spirit to it, and the spirit finds itself free from the bonds of the body and with the strength of the soul, it gains a feeling of its liberation. If the spirit is not psychically educated, it longs for matter, from which it is impregnated and so its weight does not allow it to ascend to higher spheres; it remains earth bound.

But if it is psychically educated, it rises to great heights with an unimaginable speed. This lightness gives the entity the satisfaction of that which is beautiful and pleasing.

The brain, despite its dissimilarity to a piece of cloth, can be cut and

encephalon = technical term for brain; from Greek: εγκεφαλον. Greek enkephalon from neuter of enkephalos. Literally translated = in the head.

NB:

The **cerebrum** comprises what most people think of as the ‘**brain**’ (or brains). It lies in front or on top of the brainstem and in humans is the largest and most well developed of the five major divisions of the brain. With the assistance of the cerebellum, the cerebrum controls all voluntary actions in the body. The brain is the center of the nervous system in all vertebrate and most invertebrate animals. In vertebrates the brain is located in the head, protected by the skull and close to the primary sensory apparatus of vision, hearing, balance, taste and smell.

monolithic: narrow minded (in this context).

fitted to the measurements of the spirit, by the soul.

The science of hypnotism

HIPPOCRATES: You would have heard that Man has classified hypnosis as a science. This is a mistake. One of the bigger ones!

Hypnosis is not a science. But science uses it for good or bad.

The doctor or scientist has to be observant and work hard from a humanistic point of view and to research in order to enhance his knowledge irrespective if in a number of points he succeeds or not.

Hypnotism is a power that a person can impose upon his subject and with practice, and through questions, the hypnotist can learn many aspects that the subject ignored.

From where does the subject derive knowledge that it did not have? This is explained in other books of the Spiritual World. Therefore, hypnotism assists the doctors in their work.

In older times, many men and indeed scientists, ridiculed the hypnotist. This was due to the ignorance of men. But slowly they have accepted that hypnotism is a facilitating method, especially for doctors. There are other types of scientists that use hypnotism for evil. For this reason they are condemned by human justice, if there is justice.

Therefore, do not be fooled. Hypnotism is not science, because it does not follow the same path that a scientist has followed. However, it is a power that scientists have not managed to discover.

The same as has happened with hypnotism, happens today with spirituality in underdeveloped countries. The difference is that spirituality is not science, but is the Divine Logos that does not make mistakes with its guidance, views and directions.

During my time, I perceived that I had the blessing to hypnotise and thus grasp better the reasons of the sufferer. But it was not possible for this to be made known to the public because some charlatans, such as the clergy of the time, did not allow men that had the ability to hypnotise to practice freely. They said, that evil spirits act upon them; and this was the reason why I hid my power from the imbeciles.

Today hypnotism is widespread in your world. Through this means act, not so much the doctors, but malevolent people that try to discover secrets that are either personal or national. However, this is another chapter that does not concern us now.

Today, spiritualism holds the sceptres of all knowledge of science as well as mysticism. But spiritualism is not hypnotism to exhibit all that is requested. I refer specifically to Our Centre, because We maintain a record of measure and limits of the decisions. And this, because

[21:114-116]
{13 Feb 1975}

the Highest Authority speaks up to a point, so that you do not confuse your spirit and lose your tranquillity, or even the hope that needs to be cultivated by Our enlightenment.

Spiritualism from Our side is able to carry out everything. But is this to the advantage of your entity? For this reason We act according to the advice of Our Council. And if a specific entity is about to die but it must be saved, We can save, and it will be saved.

But if there is a reason, which We do not explain and Divinity wills, then We withdraw and It acts. Divinity knows everything including the essence of the individual.

Hypnotism and spirituality

HOMER: Hypnotism has been known since prehistoric times. Man has two attributes in this area: receiver (subject) or submitter (hypnotist). The receiver does not have a strong character and his spirit is easily subdued, whereas the hypnotist holds the subject's weaker character under his instructions. When the subject obeys the hypnotist's order, slowly he falls asleep and then the subject is under the total control of the hypnotist.

As there are good and bad sides to everything, this way hypnotism does good under a good hypnotist and does harm or corrupts under a bad hypnotist.

The submission is not always of the same strength for all. But it is possible that whoever has the will to practice hypnotism can acquire strengths that are called "technical". I say technical, because there are in your world, men who have the innate power to hypnotise. With a glance they can distance a number of wild and hungry beasts. If these men used this power for good, they would be benefactors of humanity. Unfortunately, as soon as they discover that they have this strength they use it for their own benefit and cause incalculable damage to their brethren.

Hypnotism has the benefit of imposing upon the subject a situation opposite to the one that pressurises him and strengthens his will for good.

Hypnotism relaxes the body through illusions, and in this case, the body really relaxes and renews its strength. That is, the spirit under the influence of imposition replaces the senses and acts upon the body as if the true senses were operating.

Today hypnotism is exploited.

Anatomy of the abstract meaning of soul disposition

HIPPOCRATES: **Anatomy** is carried out on the human body and it is tangible and you are able to follow it. But I said "anatomy of the abstract meaning of soul disposition". Is this correct? It is! Because Man does not know this anatomy. For this reason it is abstract, since it belongs to the soul disposition, that is, to the subconscious, which

[10:243-244]

[21:162-163]
{9 Dec 1978}

Anatomy (from the Greek *ἀνατομία anatomia*, from *ἀνατέμνειν ana: separate, apart from, and temnein, to*

transmits the good or bad disposition of the soul to the spirit. That is why, when a person is happy without knowing why or he is anxious, he attributes the causes elsewhere, whereas these are unknown to him.

I could give you an image of the soul, so you can understand me. Because without images it is not possible to grasp the meaning of the information I am giving.

Within a circle, draw a cross. The circle is the human entity and the cross that is immaterial, invisible and everywhere present is the soul. This ethereal power that Man has inside him, as a Divine spark for his movements is the soul that has its divisions and subdivisions, known already to you from the text by **Goethe**.

Therefore, the soul, that is, the conscience, has dispositions. But these dispositions have to be supported by the subconscious to enhance their strength and to give to the spirit dispositions of the spiritual world. But if the spirit is focused, through the brain, on the attraction of matter, it rejects the good dispositions of the soul and incorrectly names its spiritual pleasure "soul dispositions".

This chapter is one of the most important of what you humans call psychology.

Medicine and astrology

HESIOD: I will refer to something that is known to you but at the same time is unknown.

In Our time, medicine was closely connected with Astrology. This is not an incorrect idea despite that in today's world, medicine, as science, rejects Astrology. I will show you that those that think this way are not only foolish, but are morons.

Bear in mind that Astrology is older than Astronomy. Later on, the views of astronomers and astrologists differed. The astronomers, through mathematical calculations, devoted themselves to the study of the stars, whereas the astrologers devoted themselves to the influence of the stars on human entities.

Today what are the scientists doing, when through radiations or **diathermancy** they try to improve the condition of their patients, when even these means are imperfect, whereas the radiations that the stars transmit on human entities are the most effective.

See how the sun produces natural heat, whereas your technology is harmful. So why do they not take into consideration that the stars through radiations, give natural energy to the human entity and not technical energy.

And there is something else. It takes two hundred and forty (240) years for the sun to go through its orbit; in the meanwhile the effect of the stars on entities changes. Should all these not be studied by

cut up, cut open) i.e. cut and separate. It is a branch of biology and medicine that is the consideration of the structure of living things.

Goethe: reference [5]

[21:177-178]
{26 Mar 1977}

Hesiod: Greek: Ἡσίοδος Hēsiodos; was a Greek oral poet generally thought by scholars to have been active between 750 and 650 BC. Since at least Herodotus's time, Hesiod and Homer have generally been considered the earliest Greek poets whose work has survived, and they are often paired. Hesiod's writings serve as a major source on Greek mythology, framing techniques, early economic thought (he is sometimes identified as the first economist), archaic Greek astronomy and ancient time keeping.

diathermancy is the property of some fluids to get sun rays through them without being heated. Therefore, a diathermanous fluid is permeable by heat rays.

science so that Man can benefit from the natural energies rather than the technical ones?

Do you not know that artificial food harms but the natural one does not? Then why do you use chemistry as an aid for the sustenance of your fellow men? Why do you create cancer and you attribute this to tobacco? There are men that smoke a lot but who have never suffered from cancer.

I do not want to say that those who smoke are doing well. But it is not the tobacco that causes cancer but the chemistry.

It looks as though all the scientists have become stupid and do not know what they are saying and doing. When an organism is suffering and has weak centres, of course the tobacco will harm him more. But cancer does not come from tobacco, even though in some cases it may be harmful.

Turn your eyes towards the chemical products. Not only the edible ones, but also the various ones that you call necessities; such as, deodorants, impure chemical perfumes and similar that are very popular today.

I wanted to give you some small idea of your ignorance regarding these items of known poisons that you use in your life.

Radiation from constellations

HIPPOCRATES: My dear friends and brethren, the Divine Light that is sent from Heaven through Us the co-workers of the Lord, does not ask anything from you, apart from your faith in Anarhon, Who has no other name than the known: "Unknown Authority of All".

As a Teacher of human nature's bodily pain, I disagree with the education of your doctors and scientists.

The doctor ought to be multi-faceted and to have more knowledge than he has. In this the universities hinder him. Unnecessarily they specify the number of years of study of the medical profession. Three years are sufficient plus two for practical education, then the educated one is a doctor. He must know the atmospheric pressures on the human organism, as well as the radiations from the stars on the bodies of his clients. Therefore, he must have astrological and meteorological knowledge.

For example, there are days when an operation should not be carried out. Even if it is a very simple one, the result will be the death of the operated upon patient. And there are days when operations are carried out where there are complicated symptoms, unknown to the doctor, and the operation is successful. This proves that the doctor, and not only the surgeon, but all the others who have specialities, should bear in mind all that was mentioned about Astrology and meteorology.

[21:179-180]
{21 Apr 1977}

With the machines that have been introduced to medicine, you copy all that I refer to and what you do not know, that is that the machines do not produce natural energies for the human. For this precise reason you have so many failures. Not only I have proved this. This has been verified by many of your contemporary doctors. But they are very few and their co-workers have believed them because they are seeking the easy wealth and they ignore the science and their love towards their neighbour.

I wish you health and good enlightenment so you will not be misled by the darkness that exists on Earth.

It is not sufficient to say that you believe

HIPPOCRATES: I am especially pleased for all who truly believe in My Sector. I am also pleased because amongst you is my dear **student** who I especially respect.

My dear ones, it is not sufficient to say that you believe in the Spiritual World or in My Sector. This is only a phrase empty of meaning when you do not understand and you do not enter into the true meaning of Faith, towards the Spiritual World's energies.

When your Faith is natural and correct in strength, be assured that the Spiritual World will not leave you defenceless and will act in your favour. Do not let Its invisibility make you doubt if you are going to be cured or not; except for the very few cases which I will not discuss today, that solely depend on the Lord.

If it was in My absolute jurisdiction to be useful I would do it without fear and hesitation. But as you understand there is a Higher Judgement which We immortals respect, value and accept as Just. This is for a very few people, who could have been more respectful towards the Lord, not only by word and a few good actions but by actions and words.

It is necessary for these few to learn from another Leader what are the motives that stop them becoming true faithful and respectful men.

If, sometimes We send you to earthly doctors, this means that this doctor and We cooperate, even if this cooperation is invisible in the eyes of the earthly doctors. But when Heaven decides to intervene without the assistance of an earthly doctor, then be assured that the results of Our intervention are positive.

When this occurs or when it does not, I have already clarified. You come and go according to the fame of earthly scientists. In this case, follow their fame and do not occupy yourselves with the Spiritual World.

Many times My Sector has saved the life of humans, who were condemned by science and the "thank" you for this Divine energy was that they have kept away from Him and are not interested even when excuses exist.

[21:95-97]

{24 Oct 1974}

student: amongst the participants of this particular communication was I.P. who was a student of Hippocrates in Kos in a previous incarnation.

But they will return, not to thank the Lord but to ask for new help. I do not know what His answer will be in these cases.

Bibliography

The Bibliography and references are given in a separate document called "References-Bibliography.pdf" available from the website www.divinepharos.org
